

Harford Custom Walk-ins

Coolers & Freezers Tailored to Your Needs

No one surpasses Harford's quality and experience, which are expressed in every part of our walk-ins. Uncompromising quality and non-stop attention to detail are the most important features you'll find in a Harford walk-in. Every structure we manufacture includes only the finest of materials and is produced by a team that takes extraordinary pride in their work. Harford works extra hard to ensure on-time delivery with a sophisticated tracking system that monitors the progress of your order through every stage of manufacturing. The result is a structure that arrives on-schedule, assembles easily, and will perform exactly as you expect today, tomorrow and beyond.

Harford Custom Walk-ins

Coolers & Freezers Tailored to Your Needs

There's a lot to take into account when selecting walk-in coolers and freezers. One size doesn't fit all – you need the right dimensions, details and accessories to find a walk-in that will be right for your operation.

A Harford walk-in is created to suit your exact needs. To make that possible, we start with sectional panels that can be configured to create exactly the walk-in you require, in virtually any shape or dimensions. Those panels are fabricated with durable skins – you'll choose the variety of metal that's best for you – sandwiched around a four-inch thickness of super-insulating poured-foam urethane. The panels are supported by a durable floor of the same basic construction, and complemented by exactly the accessories you need.

When it's finished, you'll have a walk-in that's truly tailored to your needs. Expect economy, long life and a favorable repair record. Above all, expect a walk-in that's a smooth-functioning part of your kitchen for years to come.

WALK-INS

- Walk-in Coolers & Freezers
- Refrigeration Systems
- Refrigerated Warehouses

High-Quality Walk-ins

The "Want It Now" from Harford

If your customer says *"I Want it Now!"*, Harford has it – 272 varieties of the most popular walk-in cooler and freezer sizes.

Top mount "Quick Connect" or pre-assembled remote refrigeration system – either medium or low temp – are on the shelf and ready to go (indoor application only). Harford guarantees shipment in five (5) working days.

WIN features:

- Basic sizes include from a nominal 6' x 6' to a nominal 12' x 24' in even sizes; and from a nominal 6' x 7' to a 12' x 15' in odd sizes.
- Bright 26 gauge stucco galvanized steel finish in and out.
- Available in two heights with vinyl screed (7' 2-1/2" or 8' 2-1/2"), or heavy duty .080 textured aluminum with OSB underlayment floor (7' 6-1/2" or 8' 6-1/2").
- You select either a left or right hand 36" entry door.
- Complete with all standard Harford features – brushed hardware, pilot switch, mounted light fixtures, freezer with anti-condensate heater (optional in cooler), mechanical closure, all NSF construction with 2-1/2" dial thermometer.

Harford Custom Walk-Ins Coolers & Freezers Tailored to Your Needs

No one surpasses Harford's quality and experience, which are expressed in every part of our walk-ins. Here are some of the ways you benefit when you choose Harford.

Insulation

- Our 4" thick, CFC-free, poured-foam urethane insulation provides a panel insulation rating (or R-value) of 28 – more than double the insulating value of fiberglass, polystyrene, or cellular glass block.
- It pays off in lower energy costs over the long life of a Harford walk-in.

Doors

- As the only moving part of your walk-in, the door gets pounded every day – so it had better be made to take it.

- Our doors are mounted on two heavy-duty hinges with pull handle and locking provisions.

- Fully equipped with all the necessary heaters and gaskets, they swing true and seal tight for years.

Floors

- To withstand rugged wear day in and day out, to maintain the highest standards of cleanability, and to all but eliminate skids underfoot, Harford walk-in floors use .080 patterned aluminum.

NOTE: Floor will support stationary loads — uniformly distributed — to 700 pounds per square foot (based on standard foot traffic and standard shelving). Not recommended for cart traffic applications.

- Our floors fully meet the stringent requirements of NSF Standard 7.
- No matter what finish is used to fabricate the wall panels, we build floor edge caps of stainless steel for top durability. Stainless steel floor surfaces are also available.

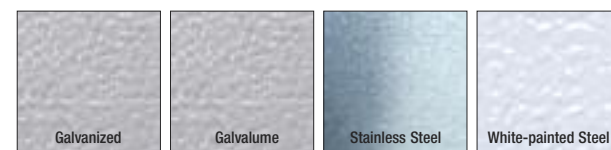

Ceilings

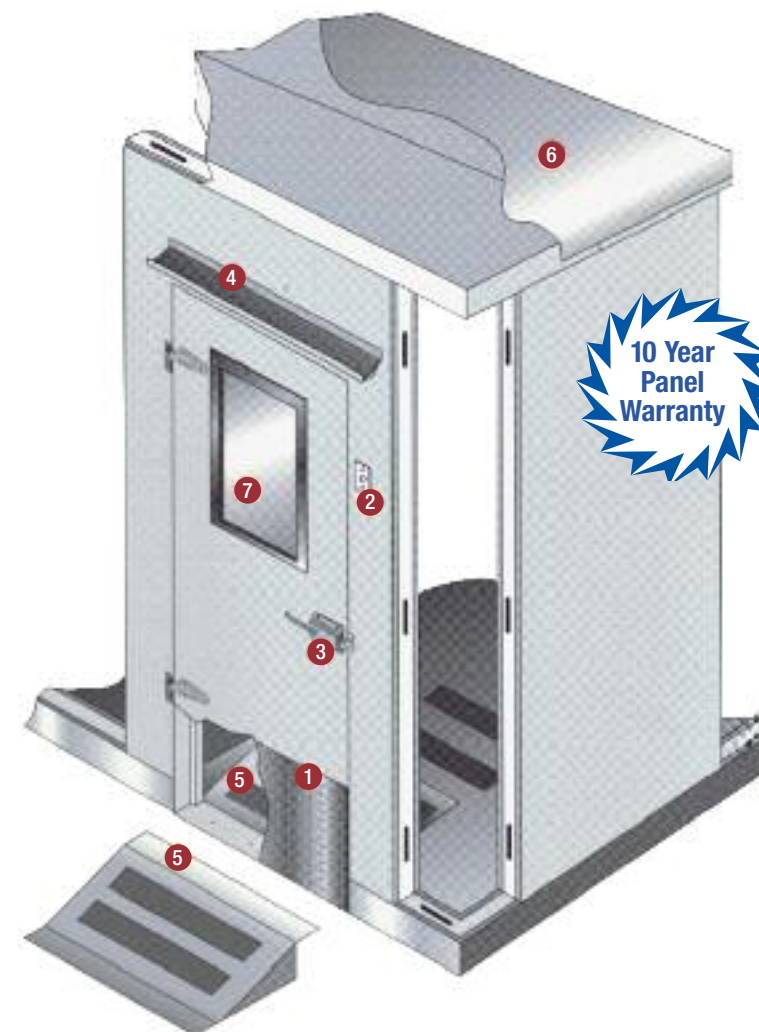

- Sturdy and secure, our regular ceiling panels are available in all the sizes of our standard wall panels.
- Special reinforced ceiling panels make it possible to cover spans up to 13' 6-3/4" without pillars or posts.
- If you need even larger widths, support the panels from overhead or with interior steel.

Finishes

- To help you find the best possible combination of good service and aesthetic appeal, Harford offers the following finishes: galvanized steel, galvalume, aluminum, stainless steel, and white-painted steel. A variety of colors is also available.

Harford cam-locking assemblies provide perfect alignment of walls, ceilings, floors, corner panels, and doorframes.

Accessories

- 1 Abuse Plate - Heavy-gauge, peen-embossed aluminum shields doors from damage. For even tougher wear, choose aluminum tread plate or stainless steel.
- 2 Alarms - Audio or visual, with optional digital temperature displays.
- 3 Handle - Standard handle includes padlocking provision. Cylinder lock handle or pull-handle quarter-turn or dead-bolt locks optional.
- 4 Rain Shield - Extra protection for outdoor installation.
- 5 Ramp - Interior or exterior reinforced ramps accommodate carts; available in 36" through 48" door widths.
- 6 Roof Cap - Guaranteed impervious to the elements in outdoor installations. Bright white membrane reflects sunlight and cuts radiant heat loads.
- 7 Window - Insulated three-pane glass in anodized aluminum frame. Heated frame and glass optional to prevent condensation or freezing.

Additional Features and Options

- Custom Lighting
- Locking Bars
- Strip Doors
- Non-skid Strips
- Floor Tread Plates
- Bumper Rails
- Special Switches
- Pass-through Doors
- Heated Pressure-relief Vents

Harford offers everything you need – for the walk-in that's exactly right for you!

The Right Refrigeration from Harford

No matter what the specific cooling or freezing requirements of your walk-in, Harford has the exact refrigeration equipment to meet them. You'll find Harford systems engineered for maximum performance, economy, and freedom from repairs. Here are some of the options we offer:

- *Self-contained Units* – Ideal for use with outdoor walk-ins, or indoors where plenty of air circulation is available.
- *Pre-assembled/Remote Systems* – These systems take condensing unit noise and heat out of your kitchen.
- *Hermetic Units* – Highly economical, fully sealed systems, especially good for low-horsepower applications.
- *Semi-hermetic Units* – Accessible for easy repair, these systems are a top choice for higher-horsepower applications, including freezers.
- *Mini-pak Systems* – These refrigeration systems move the coil out of the walk-in — especially desirable where refrigerated space is at a premium.

All Harford refrigeration systems rely on the latest generation of refrigerants – R-22 in coolers and R-404A in freezers – for minimal environmental impact.

And every Harford refrigeration unit is covered by a five-year limited warranty.
